

JEAN MARC AGUILAR

WEB DEVELOPER

Area 5A Sitio Cabuyao Naval Street Novaliches Quezon City | +63 9648816402 | jeanmarcaguilar829@gmail.com | <https://jejem.netlify.app/>

OBJECTIVE

Recent BS Information Technology graduate with hands-on experience developing web-based management systems using PHP, Laravel, SQL, HTML, CSS, and JavaScript. Seeking an entry-level Full-Stack or Web Developer position where I can apply my technical skills, problem-solving ability, and passion for building efficient, user-friendly systems while continuing to grow as a software development professional.

EDUCATION

Bachelor in Science and Information Technology Bestlink College of the Philippines	Graduated: May 2026 1071 Quirino Highway Brgy. Kaligayahan Novaliches Quezon City
--	---

PROJECTS

Microfinance- Administrative (Capstone) Full Stack Developer	2025 - 2026 https://admin.microfinacial-1.com/
--	---

- Built and maintained PHP-based backend logic for transaction validation and payment processing, cutting down manual data-entry mistakes across the admin system. Designed and implemented secure PHP web application features (authentication, transaction tracking, admin dashboards) for a financial services platform, improving accuracy over manual processes.
- Developed a full-stack microfinance management admin platform using PHP, enabling staff to monitor loan transactions and payments while reducing manual reconciliation errors.

Biyahero Back-End Developer	February 2026 https://biyahero.site/
---------------------------------------	---

- Designed and developed RESTful backend logic in PHP to support route search and ticket/trip booking features for a self-initiated commuter app.
- Independently built the backend architecture (PHP, database design) for a transportation booking platform, handling route queries and reservation data.

LOCAL GOVERNMENT UNIT 3: LOCAL TOUR GUIDE INFORMATION AND BOOKING SYSTEM WITH AI-POWERED RECOMMENDATIONS (Capstone) Back-End Developer	2025 - 2026 https://smrtreco.unit3-local.com/
--	---

- Developed a web-based local tour guide information and booking system featuring an integrated reservation workflow where user bookings are submitted to the admin dashboard for review and approval.
- Implemented an AI-powered recommendation feature that analyzes user preferences and filters tour suggestions to provide more personalized travel experiences. Integrated an automated email notification system that generates and sends booking confirmation receipts upon reservation approval.

SEMINARS & TRAININGS

- Ascent to Innovation: Where Technology Meets Tomorrow - Bestlink College of the Philippines | November 2024
